-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 6 recites the limitation "said head extends" in line 1. There is insufficient antecedent basis for this limitation in the claim.

4. The term "generally perpendicular" in claim 6 is a relative term, which renders the claim indefinite. The term "generally perpendicular" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention. Would the prong end of Lodin meet the claimed invention?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 and 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Marinescu (5,317,939).

Marinescu teaches a tool for removing and replacing a bulb comprising:

Art Unit: 2832

a tool body having a bulb accepting opening (fig. 2);
the body defining a plurality of tines 18, each tine separated by a slot (fig. 2);
the tines configured to move inward and outward (please see figs. 2 and 3) to change the size of the bulb accepting opening;

a sleeve 16 comprises of an annular member;
tines move within the sleeve 16; and
another end of the body having a projection 20.

Regarding claims 7 and 8, please see fig. 7 of Marinescu.

Regarding claim 9, the body is comprised of compressible material.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marinescu in view of Lodin (4,852,925).

Marinescu teaches the claimed invention except for another end of the body having a prong.

Lodin teaches a bulb replacement tool (fig. 1A and 2) having a prong end 50 to easy remove and replace bulbs. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the tool of Marinescu with the prong end as taught by Lodin,

Art Unit: 2832

since the prong portion of Lodin would provide the tool of Marinescu for removing the bulb covering lens (fig. 2).

Regarding claim 6, the prong 50 extends "generally perpendicular."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the attached PTO-892.
